

## Project:Village Car Share Model

### What is Project:Village?

Project:Village is committed to strengthening our rural communities by investing in innovative solutions related to food, shelter, and transportation.

### What is Project:Village Car Share program?

*Project:Village Car Share* is a new rural transportation model that introduces a car-sharing system using 4 electric cars. These cars will be connected to a booking software platform called SAUVÉR.

### Where will this car share project operate?

*Project:Village Car Share* will operate within Charlotte County. Initially, cars will be assigned to parking spaces in St. Stephen, Saint Andrews, and Blacks Harbour.

### How will this car share project operate?

Community organizations, business and industry partners, municipalities, and other service providers will be able to purchase a membership to use the cars through a booking software. Other users will be individual community members who also can register.

### When is the launch date of Project:Village Car Share?

The pilot run will start this year followed by the public launch next year.

### Who are the primary beneficiaries of Project:Village Car Share program?

- Individual community members needing transportation options
- Organizational partners needing transportation options to expand the reach and impact of its service and operations

### How will Project:Village Car Share address the community transportation needs?

*Project:Village Car Share* will provide flexible transportation options to the community. The members' autonomy to book their rides results in optimized car use and the ability to serve transportation needs.

### What is your role?

Our team is seeking collaborative partnerships with community members and organizations having the same vision towards a sustainable community. Your support for this project is a commitment you make for better community health that will enrich the quality of life in this region. The success of this transportation project brings lasting impacts and opens opportunities for progressive community growth that will sustain vibrant communities and the environment.
